Parallels For Mac With Oracle 11g

Resolution If you want to share a virtual machine among several Mac user accounts, you need to place your virtual machine in a directory which is accessible to all those accounts.. I am using a Mac and need to use Oracle 11g I have Parallels installed with Windows 8.. 1 on it Do I need to download anything else or just download Oracle 11g Express Edition and run it?.

2. parallels oracle sql

Symptoms I am unable to use my virtual machine on another Mac user account Cause The virtual machine.. The optimal variant is the /Users/Shared/ directory, where you can create a dedicated Parallels folder to store all of the virtual machine's files.. If you are creating a new virtual machine: To share your virtual machine when it is created, follow these steps: When you create a new virtual machine, at Name and Location (see picture below) select the checkbox Share virtual machine with other users of this Mac: The new virtual machine will automatically be placed in the /Users/Shared/Parallels directory, and all necessary permissions will be granted to all users of this computer.
